

Australia is in the grip of an Ice epidemic: 27 young Australians (aged 15–24) are becoming regular users of Ice each day!

#### OUR MESSAGE

**“Not  
Even Once”**

Join the fight against Ice for only \$10.00 per student

#### STUDENTS LEARN ABOUT:

- The short and long term effects associated with Ice use;
- The danger and toxicity of the ingredients in Ice;
- The mechanism of Ice addiction;
- The effects on the brain, body, relationships and community;
- The risks of trying Ice even once; and
- Communicating the risks of Ice to their peers and to take action to prevent use.

#### STUDENTS TAKE HOME:

- A USB wrist band with an imbedded 7 minute anti-drug video.
- Printed Material
- HELP Pocket Card

**Let's Put the  
Freeze on Ice!**

## The AAIC have commenced Educating High School Students about the devastating effects of **Methamphetamine (Ice)**

AAIC Volunteer Team at a local Community Forum

### In-School Education Workshop

- ★ **One-hour interactive PowerPoint and video-based education workshop** delivered to the students by an AAIC Presenter who has recovered from Ice addiction.
- ★ **Performance by a youth band** arranged by the AAIC's partner, Vibe Events enforcing our message, *'not even once'*.
- ★ **Sports-based activity for students**, conducted by a retired sports star, also enforcing our message, *'not even once'*.
- ★ **Structured role plays** to be followed up by the school within 48 hours of the In-School presentation.
- ★ **Training two teachers**, councillors or chaplains in dual diagnosis training to equip them with tools to recognise and help students at risk early.
